

Introduction to Human Design & Gene Keys

- Mission Limitless Seminar -

A Brief Overview of
Human Design

History of Human Design

In order to understand the Gene Keys and how they came to be, we have to take a step back to see the foundation it was built upon: Human Design.

Human Design was originated by Alan Robert Krakower who published a book called The Human Design System under the pseudonym Ra Uru Hu in 1992.

History of Human Design

In January 1987, Ra had an unusual mystical experience followed by an encounter with “a Voice,” an intelligence far superior to anything he had ever experienced. This encounter lasted for eight days and nights during which he received a transmission of information—what is known today as the “Human Design System.”

In 1989, after his encounter with the Voice, Ra Uru Hu wrote the Rave I'Ching, the foundation upon which Human Design rests and the key to unlocking the code of our genetics. Based on one of the oldest of the Chinese classic texts, the I'Ching, or Book of Changes, is an ancient divination tool used for over three thousand years.

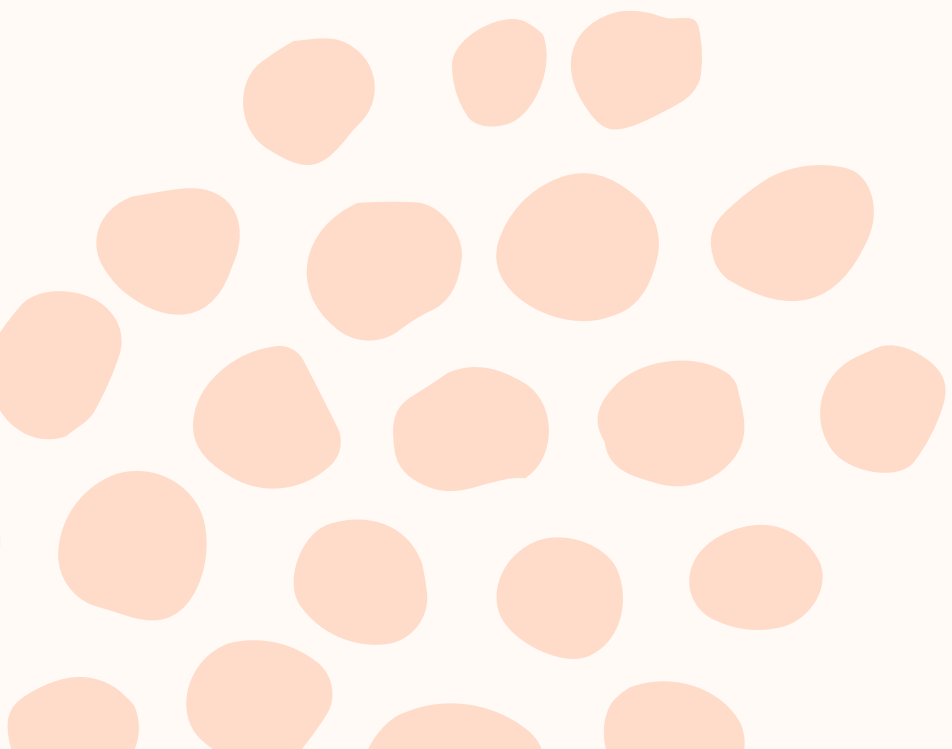

History Human of Design

The Human Design System, this science, is a combination of a synthesis of ancient wisdom and modalities: Astrology, the Chinese I-Ching, the Indian Chakra System, and the Kabbalah Tree of Life. Also woven in with the more modern sciences of quantum physics, biochemistry, and neuroscience.

Bringing in The
Gene Keys

The Gene Keys

On the other hand, The Gene Keys book was channeled by a man named Richard Rudd in 2002. Richard was a long-time student of Ra and human design. The Gene Keys system elaborates and goes much more in-depth in many ways than human design. However, there is overlap between them and they work very well together.

In Human Design there are 64 gates, in The Gene Keys there also are 64 of them, with similar energy to the gates in HD.

Each Gene Key has 6 lines which also adds a unique flavor to the Gene Keys. 384 lines total.

Introduction to the Gene Keys

**QUOTED BY RICHARD
RUDD**

"If I had to say in a single line what the Gene Keys are, I would say they are a universal language made up of 64 genetic archetypes. If I had to say what the Gene Keys do, I would say they allow you to completely re-envision yourself and recreate your life at a level limited only by your own imagination.

The Gene Keys are also a transmission. In Buddhism there is a wonderful word known as dharma. It is one of those words pregnant with many dimensions of meaning. It points towards the existence of a higher truth or universal law pervading the universe. Because the realization of the dharma is beyond words, its transmission can only be received through silence and deep meditative absorption. The Gene Keys are just such a transmission. As archetypes they each contain a fractal aspect of the same universal Truth. As genetic archetypes they allow you to resonate that Truth deep within each cell of your body."

Introduction to the Gene Keys

**QUOTED BY RICHARD
RUDD**

"This brings us to a very important point that you must know before you enter the living dharma-field of the Gene Keys. Because the Gene Keys are a transmission beyond words, they will not yield their secrets to an intellectual, grasping mind. The more you chase after them with your mind the more frustrated you may become. As archetypes, the Gene Keys are designed to be contemplated, and contemplation demands relaxation and patience. Contemplation is one of the greatest and least understood of the ancient mystical arts and paths.

There are three classic paths that lead towards higher consciousness; they are meditation, concentration and contemplation."

Introduction to the Gene Keys

**QUOTED BY RICHARD
RUDD**

"Right in the middle of these two paths is contemplation. Contemplation utilises aspects of both meditation and concentration. It is rooted in the corpus callosum, that part of the brain that unites both left and right hemispheres. Contemplation involves a kind of cellular digestion. You take the object of your contemplation and you concentrate your whole being on it but without any effort or tension. In a certain sense you play with it with your mind, your feelings and your intuition.

This is how the Gene Keys are best approached- in a spirit of deep relaxation. True intelligence is activated through the patience and softness of the heart, and only later confirmed by the mind. Here you need to be a lover of mystery with a beginner's mind, rather than arriving as an expert determined to solve a riddle."

How The Gene Keys Work

The Shadow, Gift and Siddhi

Each of the 64 Gene Keys has three different frequencies and depending on what frequency we are in depends on what flavor of each gene key we will experience.

The three aspects of each gene key are the Shadow, Gift and Siddhi.

Your Holographic Profile

There are 64 Gene Keys as Richard Rudd said. We have all 64 Gene Keys in our DNA just like we have all 64 gates in Human Design. However, some affect us more or play out in our lives more on a day to day basis based on our birthday, just like in astrology.

In Human Design there is a Bodygraph, in the Gene Keys there's a Holographic Profile made up of 11 Gene Keys. These 11 Gene Keys are from certain planetary placements from the time you are born that are in your Human Design chart also and are used to make up your Holographic Profile.

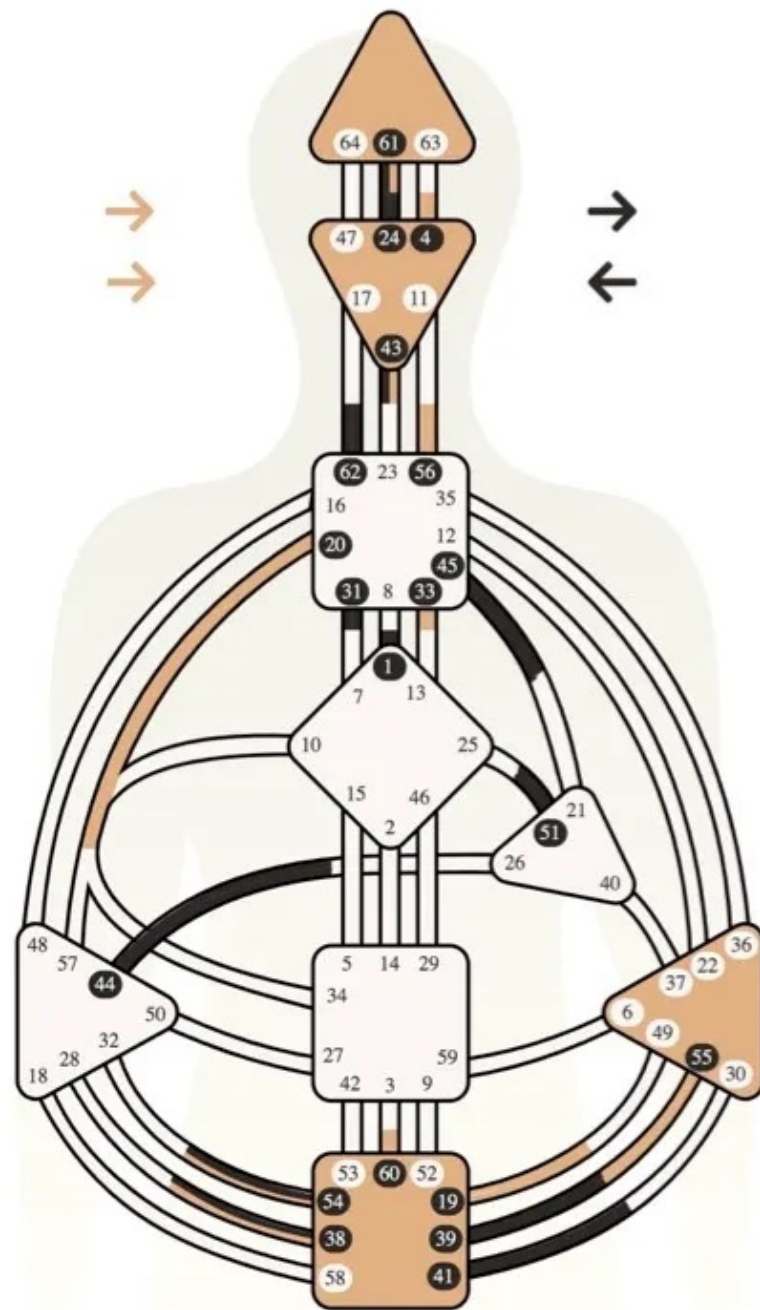

Human Design Bodygraph

Gene Key Holographic Profile

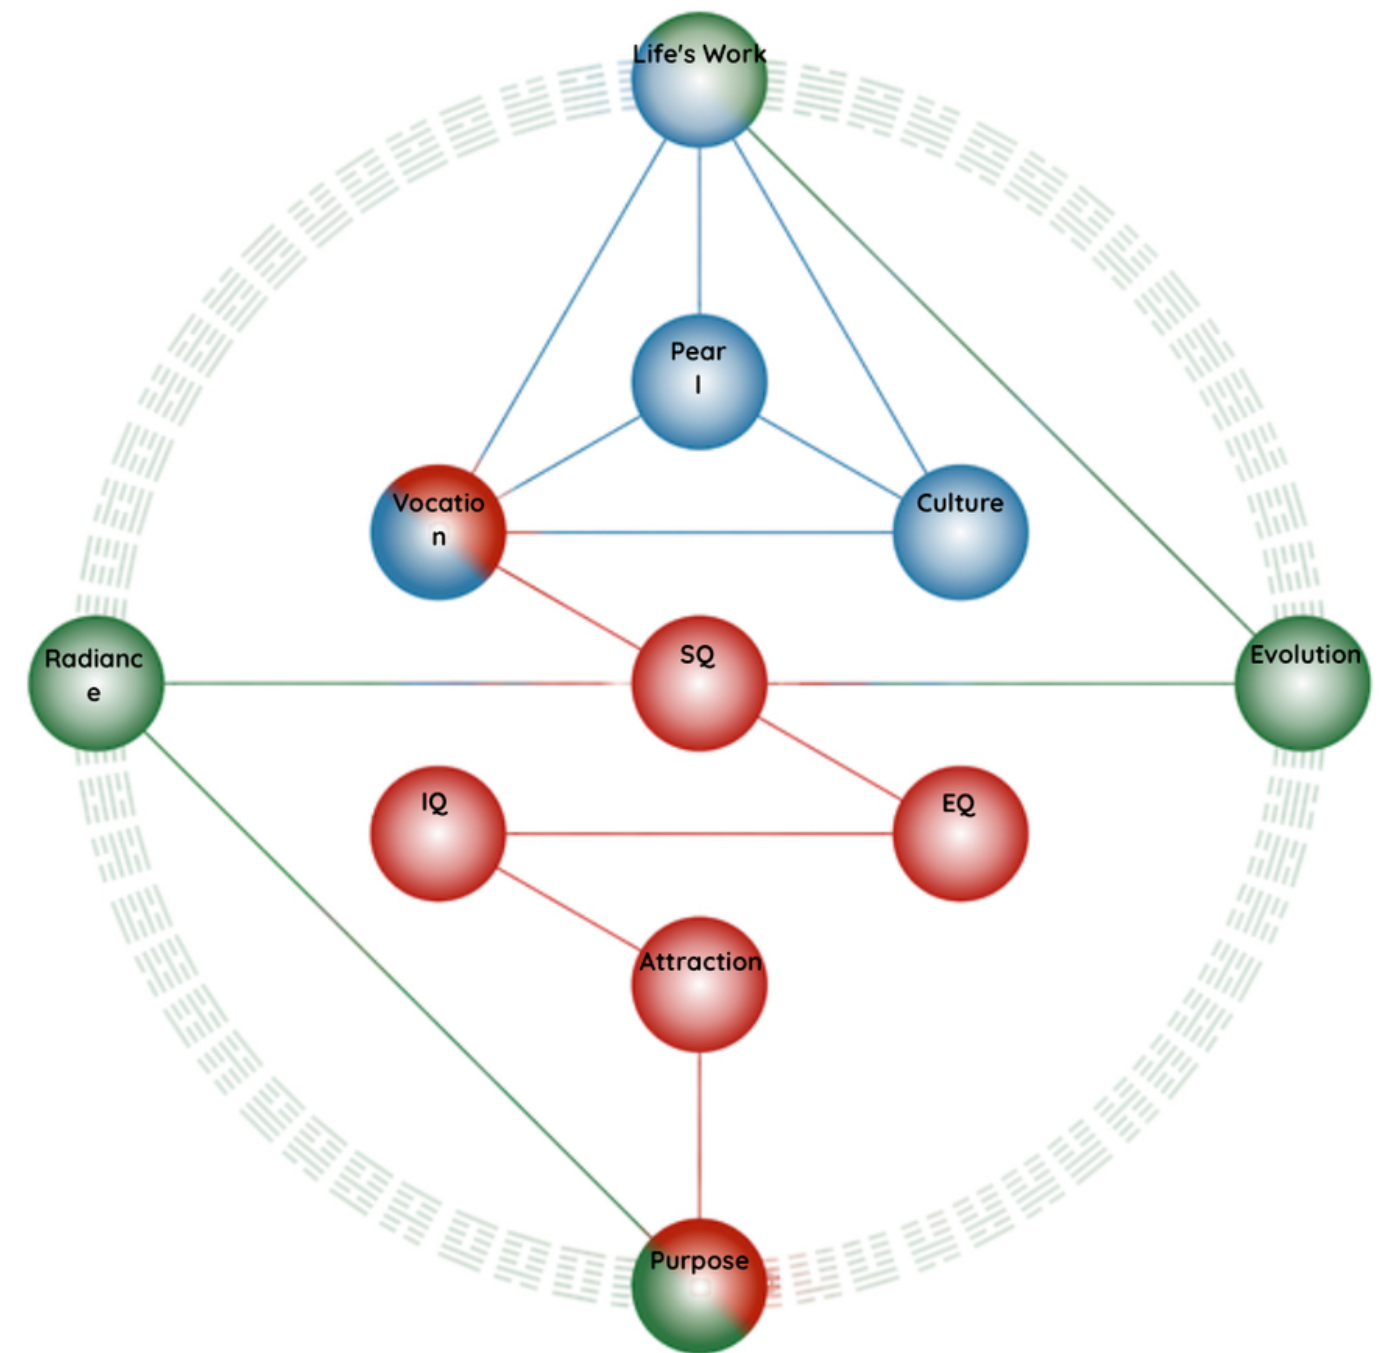

DESIGN

- ☉ 19.4
- ☽ 33.4
- ♁ 60.2
- ♃ 56.2
- ♄ 4.4
- ♅ 61.1
- ♀ 55.3
- ♁ 20.3
- ♃ 33.1
- ♄ 60.4
- ♅ 38.3
- ♆ 54.1
- ♇ 43.2

PERSONALITY

- ☉ 24.2
- ☽ 44.2
- ♁ 61.2
- ♃ 62.2
- ♄ 1.4
- ♅ 51.4
- ♀ 45.3
- ♁ 39.6
- ♃ 31.4
- ♄ 41.5
- ♅ 38.5
- ♆ 54.2
- ♇ 43.1

The Three Different Sequences

Your Holographic Profile is made up of three different colored paths. They are your Activation Sequence, Venus Sequence and the Pearl Sequence.

Activation Sequence (green):

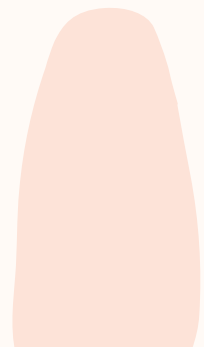

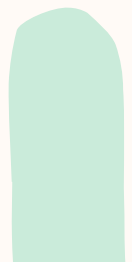

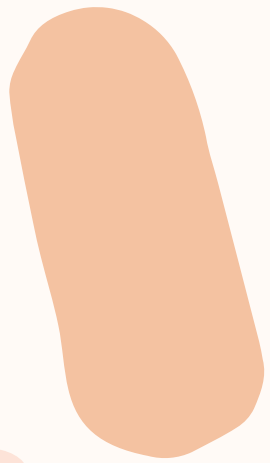

Discovering your genius through your four Prime Gifts

Venus Sequence (red): Opening your heart in relationships

Pearl Sequence (blue): Attaining prosperity through service

Why The Gene
Keys are Important

The Importance of the Gene Keys

Just like knowing your astrology chart is important for your soul growth and getting in touch with you truly are and what you are looking to accomplish in this lifetime, learning about your Human Design Chart and Gene Key Profile are equally important. We are affected by the energy of the Gene Keys everyday whether we are aware of it or not.

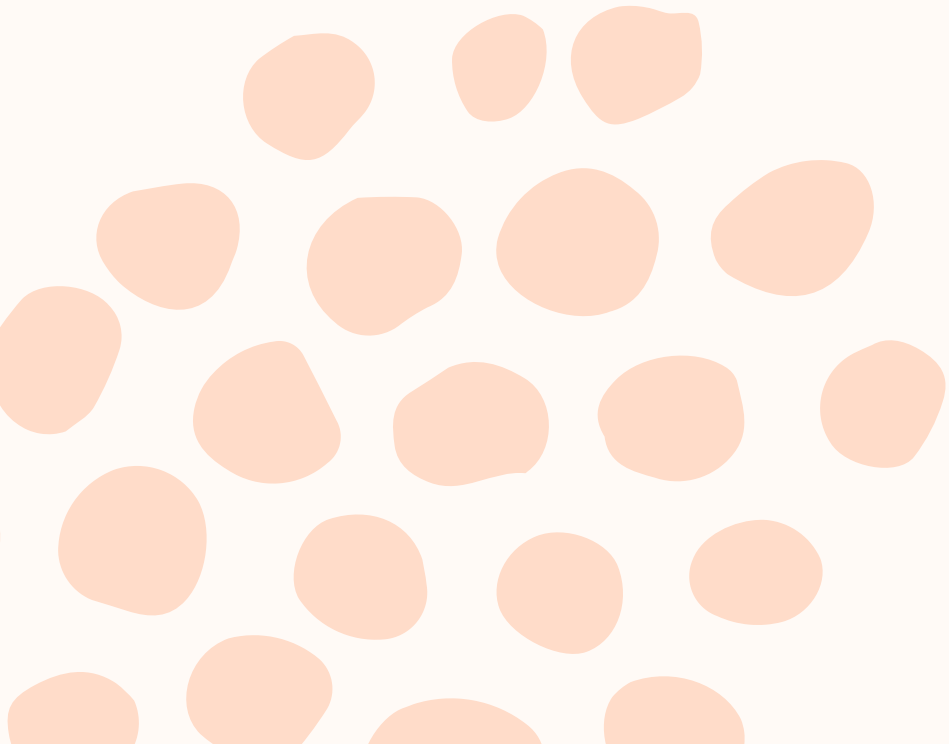

The Sun and Earth Gene Keys change every 6ish days

The Moon goes through 2/3 Gene Keys a day

Mercury, Venus and Mars change Gene keys every 6-10 days

We experience these energies as very personal influences in our day to day lives.

Heading into 2027:
A Global Mutation

Preparing for
2027

The teachings received by Ra Uru Hu also included information on the Precessional Cycle, or the 'Great Year', also known as Precession of the Equinoxes.

This astronomical phenomenon is due to a gyroscopic wobble of earth's spin axis that takes 26,000 years to complete.

When we map this precession onto the 64 Gate cycle of the Rave I Ching, we see that Earth moves backwards through each of the 64 gates in roughly 400 years.

Preparing for
2027

Frequency Shift and the Incarnation Crosses

During each 400 year period, the background frequency for the Earth and the consciousness of humanity is determined by the Incarnation Cross associated with the Gate occupied by the Precession Point.

For the past 400 years (since 1615), the Precessional point has been in Gate 37, so the background frequency has been determined by the Cross of Planning. Ra said that Humanity has been going through a transition during this time, to prepare us for the Quantum leap into the next Age.

The next change occurs in February of 2027, when the precessional point moves from gate 37 to gate 55 and we collectively move into the Cross of the Sleeping Phoenix.

*Thank you for
Joining!*

Next Sunday we will be going over the first 2 of 4 Gene Keys that make up your Activation Sequence (incarnation cross in HD) They are your Life's Work and Evolution. These Gene Keys play a big role in our day to day lives and daily growth. See you then!
